HJLITE AT YARN EXPO AUTUMN 2019

Being Asia's comprehensive yarn & fibre business platform, Yarn Expo Autumn 2019 welcomes Korean specialty yarn manufacturer **HJLite** to display their reflective yarn for weaving, knitting.

REFLECTIVITY WITH FUNCTIONALITY

With increasing demands for protective clothing, **HJLite** believes reflective yarn to be the solution to enhance the safety and functionality of garments.

SPECIALTY IN REFLECTIVITY

REFLECTIVITY WITH FUNCTIONALITY

HJLite will be presenting their **colour reflective yarns** at **Yarn Expo Autumn 2019**.

Different from the typical silver reflective yarns commonly found in the market, HJLite developed **colour reflective yarns** with high reflectivity.

HJLite Reflective Yarns / Threads are composed of **retroreflective lenses (glass beads) bonded to film and slit to very narrow widths**. They may be woven directly into ribbon, trim, piping, laces, and fabrics to achieve a variety of reflective patterns.

HJLite Reflective Yarns / Threads are primarily for high visibility fashion applications where strict norms for retroreflective efficiency are not required.

“There is no other exhibition which is specialised in the yarn market like Yarn Expo.”

There is an increase demand to enhance the protectiveness of safety garments, and reflective yarns provide a good solution. **HJLite Reflective Yarns / Threads** have high reflective performance which helps to **enhance the visibility of the wearer during nighttime or in difficult weather conditions**.
